MAISON — Client Brief

Handmade Brand | DEPI Graduation Project

1. Brand Overview

Maison is a handmade brand offering customized crochet made products based on customers' preferences, with a focus on creativity and personalization.

2. Current Business Situation

- Has previous sales, mainly to female university students.
- Participates in bazaars to reach new customers.
- Offers delivery, including to Cairo.
- Provides customized orders with flexible production timelines and pricing.

3. Target Audience

Female university students and young women interested in handmade products and personalized gifts.

4. Competitive Advantage

Product customization and a flexible, customer-oriented approach.

5. Content Preferences

- No music in content.
- No direct-to-camera speaking.
- Open to creative content ideas and collaborative product shoots.

6. Client Expectations

The client has modest initial expectations, considering a few additional orders a positive result.

7. Key Marketing Priorities

- Increase brand awareness.
- Improve social media engagement.
- Generate more orders.
- Analyze competitors and determine a suitable advertising budget.

SOSTAC FRAMEWORK — Maison

1- Situation Analysis

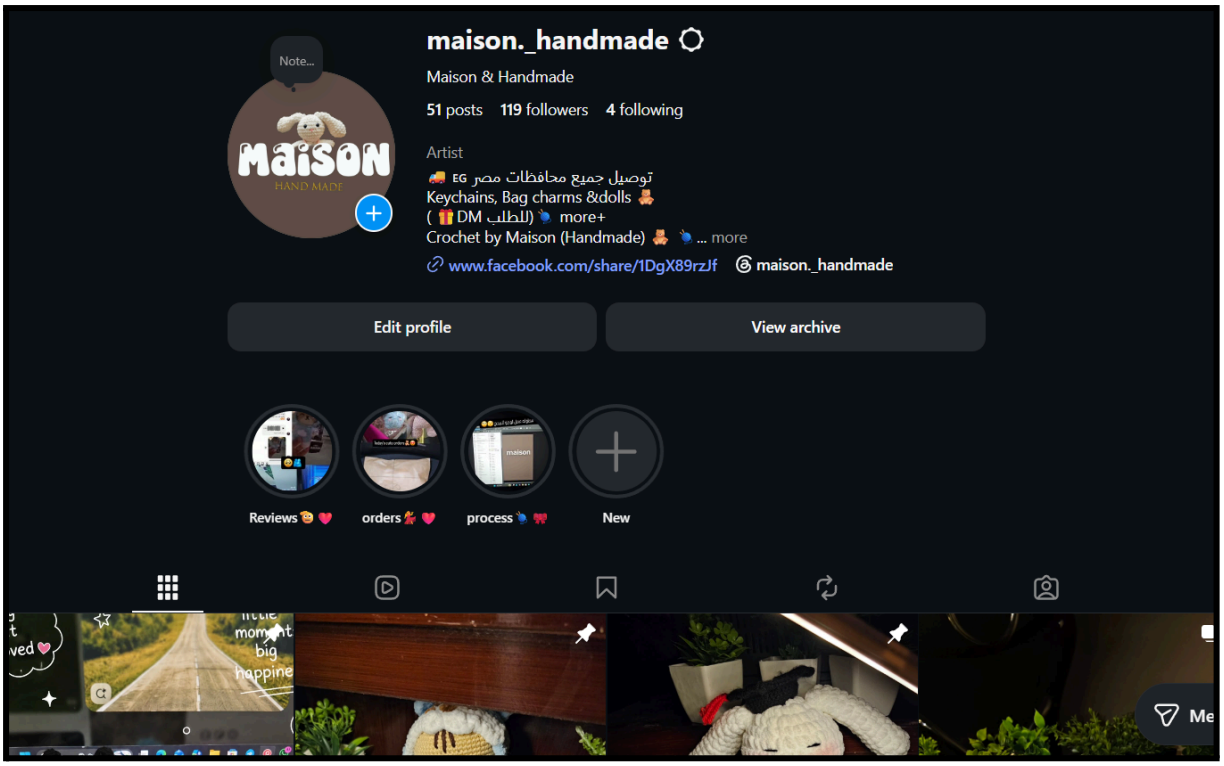

Current Digital Presence

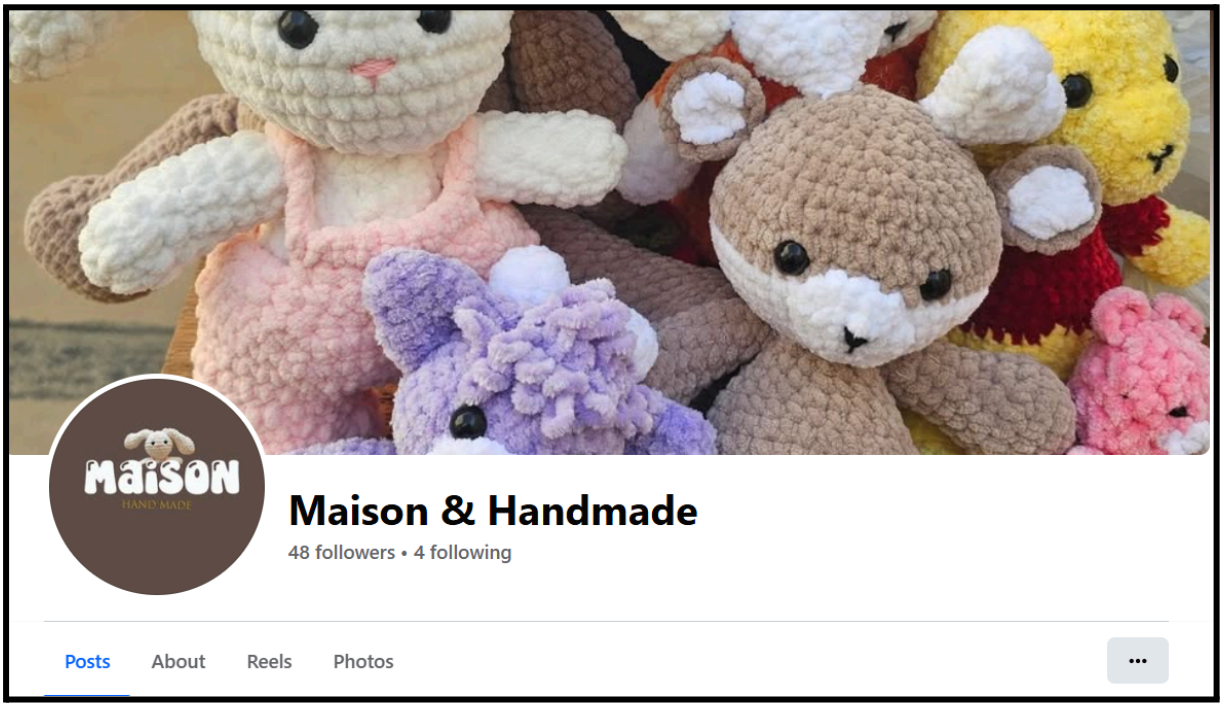

Objective: Understand Maison's current position on social media.

Content:

Maison currently uses Facebook and Instagram to showcase its handmade products and connect with potential customers.

- **Instagram Followers:** 119
- **Facebook Followers:** 48
- **Main Platforms:** Facebook & Instagram
- **Current Content:** Product-focused posts featuring handmade bouquets , bears , dolls and baby accessories.
- **Current Challenges:** Inconsistent posting, an under-optimized Instagram bio, and a lack of consistent visual identity across the platforms.

Performance Analysis — Overall Performance

Objective: Evaluate Maison's current social media performance using Meta Business Suite insights.

Reporting Period: July 23– October 20, 2026

- 

- **Visibility:** Instagram generated 518 views, compared with 153 on Facebook.
- **Profile Visits:** Instagram visits increased by 40%, while Facebook visits increased by 106.7%, reaching 31.
- **Engagement:** Content interactions declined on both platforms: 16 on Instagram (-71.9%) and 6 on Facebook (-57.1%).
- **Audience Growth:** Instagram recorded 4 follows and 3 unfollows, while Facebook recorded no new follows.
- **Conversions:** No conversations were started on either platform, and Instagram recorded no orders during the reporting period.

Key Insights

Although both platforms generated views and profile visits, declining interactions and the absence of recorded conversations indicate a gap between content visibility and customer action. Maison should focus on more engaging product content, clearer ordering information, and stronger calls to action.

Content Performance Analysis

Reporting Period: July 23 – October 20, 2026

Key Findings

- **Organic Reach: All recorded views came from organic content, with no paid advertising activity.**
- **Instagram Performance: Generated 1,407 views, compared with 787 on Facebook.**
- **Top Content: Handmade crochet products and flower bouquets were among the most-viewed content across both platforms.**
- **Performance Trend: Views and content interactions declined significantly compared with the previous period.**
- **Content Consistency: The fluctuations in daily views suggest that content visibility varied throughout the reporting period.**

Key Insight

Product-focused content provides a starting point for identifying audience interests. Maison should test more Reels, product demonstrations, and occasion-based content to determine which formats generate genuine engagement and customer inquiries.
